HELP SAVE BEN'S LIFE

DONOR DRIVE

Ben is an 8-year-old battling Acute Myeloid Leukemia (AML) for the second time in his life.

He fought like a champion and put his AML into remission earlier this year, but unfortunately he has relapsed and needs your help to beat it for good.

To recover his health, Ben needs a peripheral blood stem cell or marrow transplant.

You could be Ben's life-saving hero without even knowing it! All it takes is a swab of your cheek to find out if you are a match for him or another patient in need.

Joining the registry is as easy as a simple swab of your cheek. Eligible donors must be between the ages of 18-35 and in general good health, meet the guidelines and be willing to donate to any patient, at any time, worldwide.
